In 1938 DEMCO was established to bring electricity to southeast Louisiana. The first lines powered 750 meters. Now one of the largest electric co-ops in the country, DEMCO powers 114,000+ meters in seven parishes: Ascension, East Baton Rouge, East Feliciana, Livingston, St. Helena, Tangipahoa, and West Feliciana.

DEMCO is a not-for-profit electric cooperative that purchases power from a wholesale power supplier, then distributes that power to our members. About 65 to 70 percent of a DEMCO bill is the cost of wholesale power, and 30 to 35 percent is the cost for DEMCO to distribute the electricity to a home or business. Any profit is reinvested in the co-op to maintenance and improve our system, staffing and the communities we serve.

Local service and attention to the unique needs of our members is in large part what makes our co-op so successful. The decisions about your co-op are guided by a member-elected local board of directors, who represent all members.
In February, a polar outbreak named “Winter Storm Uri” caused historically low temperatures, ice and snow to grip many regions of the country, stressing both electric generating capacity and the ability of the transmission grid to move power from state to state and region to region. The freezing rain and temperatures affected DEMCO and other electric generation and distribution systems across the southern United States. Fortunately, DEMCO was not part of any curtailed supply or rolling blackouts, and the extraordinary wholesale power cost was spread across twelve months in members’ bills, May 2021-April 2022.

Later in 2021, DEMCO service areas were struck with Hurricane Ida – the worst natural disaster ever to hit the cooperative. More than 90 percent of DEMCO members were without power and the weeks-long restoration took 1000+ crewmen, contractors, and DEMCO staff to implement a well-coordinated and complex restoration plan. With more than four-thousand broken poles, four-hundred transformers damaged or destroyed, and thousands of miles of power line damaged or down, the three-week power restoration cost about $65 million dollars and thousands of hours of employee/contractor time and effort. DEMCO is working with FEMA and GOHSEP to recover expenses. Through all this, the DEMCO board of directors joined with me in thanking the dedicated family of DEMCO employees for their tireless work to restore power after Hurricane Ida.

In June, DEMCO converted to a new software system. All DEMCO member accounts successfully converted to the new MyDEMCO, and DEMCO staff began calibrating systems and processes. The decision to transition was founded in audit outcomes of 2019, which revealed the need to improve business operations transparency, software, and processes.

In 2021, the COVID pandemic continued to impact our members, the co-op, and the world. DEMCO continued to pivot in order to provide the highest possible service, while keeping a safe environment for employees, members and the community.
In October, DEMCO signed new wholesale power contracts with NextEra Energy to take effect in April 2024, if approved by the Louisiana Public Service Commission. These new contracts will mean lower and more stable rates for our members, with savings estimated around $160 million over the ten-year life of the contracts.

Another significant milestone reached by DEMCO in 2021 is the achievement of one million man hours without a lost-time accident. This is a tremendous accomplishment that requires daily effort and a safety mindset of each team member.

A review of DEMCO 2021 system statistics shows DEMCO’s kilowatt-hour (kWh) sales were 2,111,490,757. The number of members billed was 114,420. Total miles of line equal 8,954, and system peak demand was 612 MW. Electric plant in service is $807,112,019 of which $62,806,234 is related to Hurricane Ida Work in Progress, an increase from $722,794,111 reported in 2020.

I speak for the entire board when I say that it is an honor to represent you. Please reach out to any of us whenever we can be of assistance.

In service,

Danny Berthelot, President
DEMCO Board of Directors

Four board members were re-elected without opposition, each to serve a three-year term.

DISTRICT 7
Leslie Falks
Livingston Parish

DISTRICT 11
Tresa Byrd
St. Helena Parish
In mid-February, Winter Storm Uri blew across DEMCO service areas delivering freezing temperatures and rain that quickly turned to ice on poles, trees and power lines. Due to the weight from icy build up, our system suffered broken poles in 36 locations, downed wire in 127 locations and outages to over 22,000 meters.

The polar outbreak caused historically low temperatures that gripped many regions of the country and stressed the electric generating capacity and the ability of the transmission grid to move power from state to state and region to region. Fortunately, DEMCO was not part of any curtailed supply or rolling blackouts; however, the unprecedented demand for wholesale power costs resulted in higher bills for many regions including our co-op members.

DEMCO spread the costs of Winter Storm Uri over a year to prevent a shocking increase in one month. The Louisiana Public Service Commission allowed this approach for all utilities to help all ratepayers.

In April, DEMCO hosted our 45th annual essay contest using a remote event platform, with twelve member-students competing and four winners chosen to receive a $2,000 scholarship prize.

The four winners of the DEMCO 2021 Essay Contest and a $2,000 scholarship are: Allie Slater, Central High School, Nia Jerro, Central High School, Destiny Kelly, Denham Springs High School, and Madison Brignac, French Settlement High School.

At the May annual membership meeting, DEMCO marked twenty-eight years of our scholarship program by awarding twenty-eight $2,500 scholarships to DEMCO-member eligible students.

DEMCO also launched a new all-expense-paid leadership and educational program for 9th and 10th grade DEMCO member-students. Seven students were selected to participate in the Youth Cooperative Ambassador Program (YCAP): Shawn Comminey, II, Dutchtown High School; DeVone Holiday, Jr., St. Helena College and Career Academy; Yu’Toria Jones, Zachary High School; Aaron Kelly, Central High School; Brennan Michelli, Central High School; London Sanford, Northeast High School; and Abrielle Steele, Live Oak High.

Investing in area youth demonstrates DEMCO’s commitment to our members and the communities we serve.
The ongoing COVID pandemic resulted in worldwide supply chain issues, which cascaded into a shortage of digital chips like the ones used in smart meters. As a result, DEMCO decided to curtail the smart meter change-out of 70,000 meters in order to preserve inventory. Additional supply chain coping strategies were implemented to prepare for and stay in front of continued impacts.

Beginning in the summer, wholesale power costs for DEMCO members increased approximately 60 percent, primarily due to Cleco Power’s decision to close the Dolet Hills Power Station. These costs were pushed into the rates of all CLECO consumers, including wholesale customers like DEMCO, causing an increase in retail rates by about 25 percent, exacerbated by higher fuel costs over the same period.

In November, ribbon cuttings commemorated two new DEMCO member service centers located in St. Francisville and Denham Springs. DEMCO elects to have a physical and personal presence in each community we serve, and these buildings and the staff who work there are reminders of our local co-op spirit.

In December, DEMCO launched a funding partnership with Dolly Parton’s Imagination Library in St. Helena Parish, with administrative partner and local affiliate Volunteers of America. This book-gifting program is for children ages 0-5 to inspire a love of reading, and is a meaningful way to add lasting value to our members’ lives.

In the 4th quarter, DEMCO announced signing new wholesale power contracts for review and approval by the Louisiana Public Service Commission. DEMCO will boldly and aggressively advocate for the adoption of these contracts on your behalf and the economic benefits to our seven-parish service area.

If approved, these new power supply contracts will take effect in April 2024 and will save DEMCO members $160 million over the ten-year life of the contracts.

In an economic impact study, Dr. James Richardson, Professor Emeritus of Louisiana State University, projects the economic outcomes of lower electricity prices, and the results are staggering. Because of DEMCO members spending less on electricity, they will likely spend these savings in other areas of the economy resulting in almost $270 million in increased economic transactions, which will lead to about $90 million in additional personal earnings, almost 3,000 new jobs, and over $12 million in additional state and local tax receipts.

As DEMCO employees, we strive to do our very best every day. Our number one priority is to deliver excellent service to you – our co-op members.

In service,

Randy Pierce
CEO and General Manager
Fellow members are locally elected via a democratic process to ensure the way we conduct business is in the best interest and representative of our members. Board directors serve a three-year term.
